Correction on the days out of the office – that will be the last half of next week. So I should be available until then.

Subject: FW: NM Draft Proposal for Temporary Standards Provision

Kris,

I'm tied up working on the Gold King mine response, so I've enclosed the raw comments from our Permits Branch on the temporary standard provision. As I noted when we last spoke, the language is acceptable from a standards perspective, but it looks like there may be some language tweaks to ensure that the provision doesn't inadvertently interfere with federal regulatory language related to TMDLs.

If you have any questions, I would suggest going directly to Denise Hamilton. She will ensure that others see your questions or concerns.

I'll be out of the office rest of the week beginning tomorrow.

Russell

Stacey,

Attached are our recommendations. NMED has asked for our input NLT 8/20/15 and I assumed that Russell would be sending to NMED.

Stacey and Taim,

FYI from NMED. I will be happy to coordinate any comments we have to Russell by COB Aug 18, 2015.

Subject: NM Draft Proposal for Temporary Standards Provision

Good morning.

We have made changes to the temporary standards provision since the petition was filed based on public and stakeholder input (shaded in grey). Language is also added to address specific permit implementation concerns you raised during James' June visit to Dallas (yellow highlight). We would really appreciate your review and any feedback by Thursday, August 20th as we must meet the September filing date for a final amended petition.

Of course, we are available to discuss in more detail if needed.

Thanks!

Kris
